

Cannabis Policy

The decision to provide professional services to the cannabis industry is a business decision for individual licensees and registered firms. The Board cautions that those licensees or firms that choose to provide services of any kind to this industry should diligently address the potential risks and uncertainties involved, including but not limited to the continued uncertainty surrounding enforcement of applicable federal drug laws and related provisions of the Internal Revenue Code.

After careful consideration, the Board has determined that North Dakota licensees and firms that elect to provide services to the cannabis industry legalized in any state in which the licensee practices will not face action by the Board based solely on the fact that the licensee or firm is providing such services. However, licensees are reminded that the federal government views such activity as a federal criminal offense.
